

Be a "Green Santa" for Baton Rouge families in need!

This has been a hard year in America and although Baton Rouge has weathered the recession a bit better, many in our community are in need everyday. During the upcoming holidays you can make a lasting impact on local families with this unique charitable gift donation. Over 60% of the children in our public schools are on free or reduced lunch and many cannot afford a computer. Because of this these children fall further and further behind in school. This holiday season consider a green gift that bridges this digital divide. For a gift of \$100 the Capital Area Corporate Recycling Council can place a high-end refurbished computer system into the home of a low-income family with children and change a child's life. Donations of \$25 and \$50 can also be applied to this eco-friendly gift.

Please consider being a "Green Santa". Donate using the PayPal link above, or send a check in the amount of either \$25, \$50, or \$100 to **CACRC, 800 St Philip Street, Baton Rouge, LA 70802**. Please make all checks payable to CACRC. Call Clayton Forbes for more information at 225-379-3577 or email him at cforbes@cacrc.com. Thank you for your generous support!

First OSBR Computer Class Graduates

The Old South Baton Rouge Computer Class graduated on Saturday December 5. One of the students is determined now to go on and get a degree from BRCC. One student is volunteering soon at the CACRC to help give back. Another student said the computer she is taking home will be the first in her home and a gift for her kids this Christmas. Everyone young and old said they loved the class and that Zach was an awesome teacher. AWESOME!!!!

NOLA High School Student starts School Recycling

Eric Oliver, a senior at the Edna Carr HS in New Orleans, chose e-recycling for his science class project. He spent several weeks collecting surplus electronics, and tried to find a place to drop them off in New Orleans. When he could not find it, he did a web search and found us. He is very conscious about e-recycling, and very interested in the workings of an e-waste drop-off facility and in the final destination of the items he collected.

Finally, we want to thank all of our supporters, and wish everybody the best during this Holiday Season!
